

Physical Agent Modalities for the Rehab Professional

*** Green Track**

Physical Agent Modalities (PAM's) for the Rehab Professional is designed to educate OT/COTAs in the use of electro-physical agents in the areas of electrical stimulation (pulsed, alternating, and direct current), and superficial and deep thermal agents (ultrasound, shortwave diathermy and laser). This course is also open to PT/PTAs and Athletic Trainers (ATs).

The biophysical principles of each physical agent will be presented. The physiologic effects, indications, precautions and contraindications will be emphasized, along with the **best current practices**. The appropriate **selection** and **application** of physical agents, based on the existing pathology, impairments, and functional limitations will be **discussed, demonstrated, and performed by participants**. Safe and effective parameter selection, **dosing** of intensity, and **documentation** of treatment will be emphasized during the lecture and laboratory portions of the course.

This course will prepare the participant in the theory and clinical application of transcutaneous electrical stimulation (TENS), neuromuscular electrical stimulation (NMES), functional electrical stimulation (FES), iontophoresis, phonophoresis, and continuous and pulsed therapeutic ultrasound.

The course includes:

Lectures, hands on lab practice, case studies, and quizzes.

NOTE: Please bring lab attire that allows for access to the shoulders (e.g. loose fitting t-shirt or tank top)

Joseph A. Gallo
DSc, ATC, PT.

Dr. Gallo has taught over 300 PAM courses during the past 20+ years. He receives consistent excellent evaluations across disciplines, from OTs to PTs to ATs to DCs.

"Joe is knowledgeable, passionate & energetic. Best course that I have been to in 15 years and best speaker I have had in any CE class. Who knew modalities would be so much fun?"

OT - Chicago, IL 2011
